IN THE CLAIMS:

Please amend independent claims 1 and 11 so that a complete listing of claims read as
follows.

1. (Currently Amended) Method of maintaining files on a computer grid
comprising:

detecting at least one member of the computer grid;
determining a usage profile <u>including a running usage register</u> of the
member;

determining a fingerprint for files stored on the member;
storing the fingerprint with an associated file name in a database; and
performing a maintenance function based on the database <u>and the usage</u>
<u>profile</u>

2. (Original) The method of claim 1 wherein the database comprises at least
one file characteristic.

3. (Original) The method of claim 2 wherein the file characteristic is
selected from a group consisting of a file location, a file time, and a file size.

4. (Original) The method of claim 1 further comprising identifying at least
one exempt member wherein the exempt member is exempt from the maintenance
function

5. (Original) The method of claim 1 wherein performing the maintenance
function comprises:

determining a storage file; and
archiving the storage file.

6. (Original) The method of claim 1 wherein performing the maintenance function comprises:

determining an unnecessary file based on the database; and

deleting the unnecessary file.

7. (Original) The method of claim 1 wherein performing the maintenance function comprises:

determining a corrupt file based on the fingerprint; and

repairing the corrupt file.

8. (Original) The method of claim 1 wherein performing the maintenance function comprises:

determining a tagged file,

locating the tagged file; and

restoring the tagged file.

9. (Original) The method of claim 1 wherein performing the maintenance function comprises:

determining a member disk capacity; and

performing the maintenance function based on the member disk capacity.

10. (Original) The method of claim 1 wherein performing the maintenance function comprises:

determining an optimal maintenance time of the member based on the usage profile; and

performing the maintenance function at the optimal maintenance time.

11.   (Currently Amended) A computer usable medium including a program for maintaining files on a computer grid comprising:

computer readable program code for detecting at least one member of the computer grid,

computer readable program code for determining a usage profile including a running usage register of the member,

computer readable program code for determining a fingerprint for files stored on the member;

computer readable program code for storing the fingerprint with an associated file name in a database, and

computer readable program code for performing a maintenance function based on the database and the usage profile.

12.   (Original) The computer readable program code of claim 11 wherein the database comprises at least one file characteristic.

13.   (Original) The computer readable program code of claim 12 wherein the file characteristic is selected from a group consisting of a file location, a file time, and a file size.

14.   (Original) The computer readable program code of claim 11 further comprising identifying at least one exempt member wherein the exempt member is exempt from the maintenance function.

15   (Original) The computer readable program code of claim 11 wherein performing the maintenance function comprises:

determining a storage file; and

archiving the storage file.

16.   (Original) The computer readable program code of claim 11 wherein . performing the maintenance function comprises:

determining an unnecessary file based on the database; and

deleting the unnecessary file.

17   (Original) The computer readable program code of claim 11 wherein performing the maintenance function comprises.

determining a corrupt file based on the fingerprint; and

repairing the corrupt file.

18   (Original) The computer readable program code of claim 11 wherein performing the maintenance function comprises:

determining a tagged file;

locating the tagged file; and

restoring the tagged file.

19.   (Original) The computer readable program code of claim 11 wherein performing the maintenance function comprises:

determining a member disk capacity, and

performing the maintenance function based on the member disk capacity.

20.   (Original) The computer readable program code of claim 11 wherein performing the maintenance function comprises:

determining an optimal maintenance time of the member based on the usage profile; and

performing the maintenance function at the optimal maintenance time.
